KEY FEATURES

- One piece molded construction.
- Molded from black general purpose ABS plastic.
- Temperature rated -20° to +94° C.
- 1.0 mm (0.04") wall thickness.

Values noted above are typical values for reference only. These values may vary between material manufacturers and within normal manufacturing tolerances.

Resistance of material to different media				
Material	Polystyrene ABS		Flame Retard.ABS	Poly- carbonate
Gasoline	-	0	0	-
Diesel Oil	-	+	+	0
Sea Water	+	+	+	-
Hydrochloric Acid, 10%	+	+	0	+
Weak Alkaline	+	+	+	-
Strong Alkaline Solution	+	+	+	-
Atmospheric Influences	0	0	0	+
Lactic Acid	+	+	+	+
Acetone	-	-	-	-

Value at room temperature: + = stable, 0 = relatively stable, - = unstable

Simultaneous exposure to different media may alter the resistive properties of a material! To be safe, it is advisable to test the cases for sufficient resistance to the material under the condition of the specific application.

Flammability Rating

94 V-O

Test samples are extinguished within 5 seconds average time. None of the test samples burn longer than 10 seconds. No test samples emit burning particles.

94 V-1

Test samples are extinguished within 25 seconds average time. None of the test samples burn longer than 60 seconds. No test samples emit burning particles.

94 V-2

Similar to 94 V-1, except test samples emit burning particles during the test. The test sample is extinguished in all cases mentioned above. If the sample continues to burn after 25 seconds a horizontal test can be performed to meet classification.

Technical Information

Degree of protection - "IP" Codes Information Example:

IP 55

	I.P. Protection Classification					
Degrees	Degrees of contact prevention and guarding against foreign objects					
1st I.P. Digit	Designation	Explanation				
0	No protection	No protection of personnel from direct contact with active or moving parts. No protection from access of solid foreign object.				
1	Protection against large foreign bodies	Protection of personnel from accidental large area direct contact with active or internal moving parts (hand contact etc.) but no guard against intentional access to such parts. Protection from access of solid foreign object larger than 12 mm in diameter.				
2	Protection against medium foreign bodies	Protection of personnel from finger contact with active or internal moving parts. Protection from access of solid foreign object larger than 12 mm in diameter.				
3	Protection against small foreign bodies	Protection of personnel from touching active or internal moving parts with tools, wires or similar foreign objects thicker than 2.5 mm. Protection from access of solid foreign matter larger than 2.5 mm in diameter.				
4	Protection against granular foreign bodies	Protection of personnel from touching active or internal moving parts with tools, wires or similar foreign objects thicker than 1 mm.				
5	Protection from deposit of dust	Total protection of personnel from touching voltage carrying or internal moving parts. Protection from harmful deposit of dust. Access of dust is not completely prevented.				
6	Protection from access of dust	Total protection of personnel from touching voltage carrying or internal moving parts. Protection from access of dust.				

	I.P. Protection Classification				
Degrees of water protection					
2nd I.P. Digit	Designation	Explanation			
0	No protection	No special protection			
1	Protectiion against water dripping vertically	Water drops falling vertically must not have any harmful effect.			
2	Protection against water dripping off vertically	Water drops falling at any angle up to 15° from the vertical must not have any harmful effect.			
3	Protection against spray water	Water drops falling at any angle up to 15° from the vertical must not have any harmful effect.			
4	Protection against splash water	Water splashing against the object from all directions must not have any harmful effect.			
5	Protection against jet water	A jet of water nozzled from all directions must not have any harmful effect.			
6	Protection against flooding	Water from temporary flooding, such as heavy seas, must not enter in any harmful quantity.			
7	Protection in dipped state	If the object is dipped into water under the defined conditions of pressure and time, water must not enter it in any harmful quantity.			
8	Protection in submerged state	If the object is submerged in water, water must not enter in any harmful quantity.
